

**Press Release – For Immediate Release**

**Hunter Systems Group Wins the Minnesota Department of Corrections State Contract to Provide Hunter Smartshot® to Its Facilities**

***The Minnesota DOC has purchased 13 units for its Corrections Facilities to Replace Its Existing Photo Manager Application***

Scituate, MA. April 11, 2013. Hunter Systems Group, Inc. today announced that it has executed a contract with the Minnesota Department of Administration to Supply 13 Hunter Smartshot® systems to the State’s Department of Correction facilities. This contract permits the Minnesota DOC to replace its existing Photo Manager Application with a fully integrated system that captures NIST-compliant, facial recognition-ready mug shot photographs with just a click of a mouse.

“We are excited to work with the State of Minnesota as we robustly expand our presence throughout the Midwest law enforcement market. We believe that this is a beneficial product for correctional institutions around the country to use since it captures consistent, biometrically-capable, facial recognition-ready photographs and mug shots,” states President and CEO Mark Thompson.

“Inconsistencies in lighting and positioning are practically eliminated when the process is completely automated and employs biometric capabilities. With Hunter Smartshot®’s easy-to-use technology, photographs originating from the Minnesota Department of Corrections will be NIST-compliant and enabled for facial recognition deployment.”

Upon completion of the contract, Hunter SmartShot® will be installed in over 350 law enforcement locations around the United States and abroad.
